

# T-STATION 85 TURBOMOLECULAR PUMPING STATION

edwardsvacuum.com

**T-Station 85 is a low cost, compact turbomolecular pumping station that seamlessly combines the nEXT85H turbomolecular pump with either an oil-free scroll, dry diaphragm or oil sealed backing pump, and a simple controller, providing pumping speeds of 47 to 84 ls<sup>-1</sup>.**

The T-Station 85 comes with an integrated Turbo and Active Gauge controller which enables single button start/stop of the system. This is combined with the ability to control one of our active gauges, vent valve control and delayed start of the turbomolecular pump to either time or pressure if a gauge is fitted, making the T-Station 85 ideal for general laboratory needs.

Primary vacuum is achieved with either:

- **mXDS3s** oil-free dry scroll pump with pumping speeds of 3 m<sup>3</sup> h<sup>-1</sup> and ultimate vacuum of 0.1 mbar. This option also comes with a fitted inlet valve to protect against power failure and exhaust ballast
- **E2M1.5** oil sealed pump with pumping speeds of 1.6 m<sup>3</sup> h<sup>-1</sup>
- **XDD1** dry diaphragm pump with pumping speeds of 1.2 m<sup>3</sup> h<sup>-1</sup>

As well as reducing pump down time, improving efficiency and energy consumption, the mXDS3s option also comes with fitted inlet valve designed to protect the vacuum in the event of a power failure as well as integrated exhaust filter.

**'Plug and Pump'  
No systemisation  
required**

**Robust construction  
Low cost of  
ownership**

## Features and benefits

- Base plate includes rubber feet and cut-outs in the sides for manual handling, giving a compact low profile but stable design that can't be knocked over
- All metal frame means rugged design that can take abuse without cracking or breaking
- A choice of the latest mXDS3s oil-free dry scroll pump, the E2M1.5 oil sealed pump, or the XDD1 dry diaphragm pump for the fore vacuum
- E2M1.5 or XDD1 high capacity backing pumps giving the choice between an oil sealed pump or a totally dry diaphragm pump
- Integrated air cooler acts to cool internal power supply and pump/controller for quiet operation avoiding multiple fans
- Customer integrated control features:
  - » Single dedicated button to start/stop
  - » Easy to read accuracy display
  - » Ability to select vent mode where a TAV5 vent valve is fitted for automated venting with no user intervention
- Available with either an NW40, ISO63 or CF63 inlet flange to suit your application.
- User serviceable nEXT85H turbomolecular pump

**Technical data**

<b>Pumping speed no N<sub>2</sub></b>	
NW40	47 ls
ISO/CF63	84 ls
<b>Compression ratio for N<sub>2</sub></b>	>1 x 10 <sup>11</sup>
<b>Backing pump speed @50 Hz</b>	
mXDS3s	3 m <sup>3</sup> h <sup>-1</sup>
E2M1.5 (TS85H wet)	1.6 m <sup>3</sup> h <sup>-1</sup>
XDD1 (TS85H dry)	1.2 m <sup>3</sup> h <sup>-1</sup>
<b>Ultimate vacuum</b>	
Dry ISO63	<5.10 <sup>-8</sup> mbar
Dry CF63	<5.10 <sup>-9</sup> mbar
Wet ISO63	<5.10 <sup>-9</sup> mbar
Wet CF63	<5.10 <sup>-10</sup> mbar
<b>Inlet flange</b>	DN 16 ISO - KF
<b>Exhaust flange</b>	
mXDS3s	1/8 BSP or 6x8mm
E2M1.5 (TS85H wet)	11 mm OD nozzle or 3/8" BSP
XDD1 (TS85H dry)	Fitted silencer or 1/8" BSP
<b>Mass</b>	
mXDS3s	19 kg max
E2M1.5 (TS85H wet)	21 kg max
XDD1 system (TS85H dry)	18 kg max
<b>Noise level</b>	54.0 +/- 2.5 dB(A)
<b>Operating temperature range</b>	
Dry Vacuum pumps	+5 to +40 °C
Wet Vacuum pumps	+12 to +40 °C

**Ordering information**
