

# RACE-READY PERFORMANCE

Achieving peak performance and long-term cost efficiency starts with timely maintenance, helping you get the most value from your operations. With our **Parts Care** plan, our seamless parts delivery system ensures you receive the right parts exactly when needed.

## Streamlined Maintenance with Scheduled Parts Delivery

Staying on top of maintenance is key to reliable performance, cost control, and extending asset life. **Parts Care** delivers genuine parts tailored to your operating conditions; each shipment timed to align with your tailor-made maintenance schedule.

## How can you improve maintenance efficiency and lower administrative costs?

Managing spare parts manually can consume time, strain resources, and increase the risk of missed service windows, often leading to higher administrative costs and potential breakdowns. We support you by automating the delivery of genuine spare parts and oils at a predetermined cost, all under a single purchase order.

## How can you improve the reliability of your vacuum system through timely delivery of genuine spare parts?

Timely maintenance helps prevent unexpected failures and keeps performance at its peak. We ensure that all essential genuine parts are delivered exactly when needed, empowering your team to perform maintenance at the right time.

## How can you be assured of your vacuum system's performance when using genuine parts?

To keep your operations safe, reliable, and extend your asset life, it's essential to use parts specifically engineered for your equipment. Edwards offers genuine spare parts designed to exact specifications and rigorously tested for performance.

**Genius**  
INSTANT INSIGHTS™

Real-time monitoring empowers you to stay ahead of service needs, enabling timely interventions that prevent downtime, reduce costs, and keep your operations running smoothly. With ServicePlan™ you have the option to connect to GENIUS Instant Insights™, a remote monitoring solution that provides instant access to performance and service status from anywhere.
